

Bastion Digital Bank-in-a-Box

A complete, modular banking platform for licensed banks, EMIs, payment institutions and fintechs.

PRODUCTION
MODULAR
WHITE-LABEL

Launch a digital bank in weeks - not years.

Bastion combines customer apps, bank operations, payments, cards, accounting, compliance and reporting in one production platform - adapted around your license, partners and business model.

LIVE OPERATING EXPERIENCE

Hundreds of millions

in monthly transaction volume

40+ fiat currencies | 20+ active services

ONE COMPLETE PLATFORM

- Customer onboarding, KYB/KYC and AML workflows
- Multi-currency accounts, double-entry ledger, P&L and balance sheet
- Domestic and international payments, FX, fees and bulk payments
- Physical and virtual cards: issuing, authorization, settlement and reconciliation
- Web, mobile, admin, operations, compliance, support and finance workspaces

BUILT AROUND YOUR BUSINESS

- White-label branding, configurable roles, products, fees and modules
- Connect your own banks, processors and compliance providers
- Shared Bastion environment, dedicated cloud, client cloud or on-premises
- Import customers, documents, accounts, balances, history and beneficiaries
- Full platform or selected modules; source code and escrow by agreement

WHY BASTION

- A working production product - not a slide deck or collection of disconnected APIs
- Shared deployment can be configured in hours; custom launch is typically measured in weeks
- Provider-neutral architecture reduces lock-in and supports future integrations
- Built-in ledger and reconciliation show where money moved and why balances differ
- Direct access to the principal architect and support across US, European and Asian time zones

ONBOARDING	ACCOUNTS	PAYMENTS	CARDS	LEDGER	RECONCILIATION
FX & FEES	BULK PAYMENTS	AML/KYC	CRYPTO	REPORTING	WEB & MOBILE

1 DISCOVERY

Map license, target market, providers, operating model and launch scope.

2 60-DAY PILOT

Run real users on a shared environment with onboarding, accounts, payments, admin and reporting.

3 PRODUCTION

Add dedicated integrations, cards, migration, SLA, scaling and customer-specific workflows.

REVENUE CONTROL

Flexible fee rules by client, operation, currency and product - with real-time P&L and reporting.

ACCOUNTING CONTROL

Trace money from the customer account through provider balances, ledger postings and reconciliation.

REAL-TIME EXPERIENCE

Balances, transactions, card events and alerts update across web and mobile without manual refresh.

BEST FIT

Licensed banks, EMIs, payment institutions, card program managers, fintech startups and digital-asset businesses.

OPERATING PROOF

Live workloads up to 8,000 payments/day • recovery objective about 30 minutes • 70-95% automated test coverage across active services.

Tell us your license, current providers and biggest operational bottleneck.

We will map a practical production path in one working session.
